PROFILE

Results-driven ICT graduate with a Diploma in Information and Communication Technology (Applications Development), equipped with a solid foundation in software development, database management, and system design.

Demonstrates strong analytical thinking, problem-solving ability, and a clear understanding of business and system processes. Proven ability to work effectively both independently and within a team through academic projects, delivering functional and user-focused solutions.

A proactive and disciplined individual with high levels of integrity, professionalism, and a strong commitment to continuous learning. Eager to contribute technical skills and grow within a structured graduate development programme while adding value to organisational objectives.

EDUCATION

Sol Plaatje University

2022 – 2024

Diploma in Information and Communication Technology (Applications Development) — NQL Level 6

Average: 70%

Relevant Coursework:

- Programming
- Software Engineering
- Information Systems
- Communication Networks Fundamentals (Cisco Packet Tracer)
- Data Analysis and Visualisation
- Professional Communication

CORE SKILLS

- Strong analytical and problem-solving skills
- Business and systems understanding
- Administrative and organisational skills
- Effective communication and interpersonal skills
- Ability to work collaboratively in a team environment
- Customer-focused approach to problem-solving
- High level of integrity and professionalism
- Conflict resolution and adaptability
- Ability to work under pressure and meet deadlines
- Proactive, self-motivated, and detail-oriented

TECHNICAL SKILLS

Programming & Web Development: HTML, CSS, Java, PHP, JavaScript (Basic)

Databases: MySQL, SQL

Systems & Networking: Computer Systems Installation & Configuration, Networking Fundamentals, Cisco Packet Tracer

Tools & Technologies: Microsoft Office (Excel, Word, PowerPoint, Teams), Visual Studio Code, NetBeans, XAMPP

PROJECTS

Funeral Parlor Management System (*Academic Team Project*)

- Developed responsive user interfaces using HTML, CSS, and JavaScript
- Built backend functionality using PHP and integrated with MySQL database
- Applied validation techniques to improve data accuracy and user experience
- Participated in system testing, debugging, and continuous improvements
- Collaborated effectively within a team following SDLC principles

Technologies Used: HTML, CSS, JavaScript (basic), PHP, MySQL

Employee Clock-In / Clock-Out System (*Individual Project*)

- Designed and developed a secure login and authentication system
- Implemented business logic to prevent multiple clock-ins without clock-out
- Automated working hours calculation and attendance tracking
- Created an admin dashboard for reporting and monitoring
- Managed full system development lifecycle independently

Technologies Used: HTML, CSS, JavaScript (basic), PHP, MySQL
