DEVELOPMENT EXPERIENCE

CAPACITI Tech Career Accelerator

2026 - Present

Software Development Intern

- Develop full-stack and AI-powered applications through practical, sprint-based projects and assessments.
- Apply software development concepts to translate project requirements into functional application features.
- Build and integrate front-end interfaces, back-end services and databases using a range of technologies.
- Practise troubleshooting, analytical problem-solving, collaboration and delivery within deadlines.
- Recently completed a Software Development course on Coursera; additional learning includes Google AI Essentials and AI/Generative AI fundamentals.

TECHNICAL SKILLS

Programming & markup Java, Kotlin, Python, PHP, JavaScript, HTML, CSS, SQL

Front end React, Vite, React Router, responsive web development

Back end & frameworks Spring Boot, Flask, Django, Node.js, Express

Databases PostgreSQL, MySQL, MongoDB

AI & data LangChain, Ollama, Pandas, NumPy, data analysis and visualisation

Tools Git/GitHub, Docker, VS Code, XAMPP, NetBeans, Microsoft Office

SELECTED PROJECTS

DeskFlow - IT Service Request Portal

- Developed a full-stack portal for submitting, tracking and managing internal IT service requests, with employee and administrator workflows.
- Used React/Vite, Node.js/Express, MongoDB/Mongoose, Axios and Swagger. Deployed the front end and back end separately.

OpenEx 3.0 - Simulated Crypto Exchange & AI Trading Terminal

- Built a multi-service application combining trading workflows, market data and an AI trading assistant.
- Used Kotlin/Spring Boot, React/Vite, PostgreSQL, Python/Flask, LangChain, Ollama, Redis and Docker; implemented matching-engine logic and a double-entry ledger.

PROFESSIONAL STRENGTHS

- Analytical thinking, structured problem-solving and attention to detail
- Team collaboration, clear communication and openness to feedback
- Adaptability, initiative and willingness to learn new technologies
- Resilience and ability to work towards deadlines
